Empowering young men to build a better future.

Year-long STEM program for boys in grades 6-8

Every young man deserves access to a better future. That’s why we’ve launched the Verizon Innovative Learning program for young men of color – an engaging year-long program where 6-8th grade males will learn design thinking, 3D printing, augmented reality, and social entrepreneurship skills. This program is designed to create a more diverse pipeline for future careers in STEM (Science Technology Engineering & Math) fields. No prior knowledge or experience is required.

Join us at no cost to you:

2020 - 21

When?

July 2020 - May 2021

Where?

Tuskegee University

The year long program kicks-off with a 3-week summer engagement piece followed by monthly sessions throughout the school year.

The program includes:

• Lunch & Snacks
• Hands-on and interactive sessions, with field trips and mentoring.

The Verizon Innovative Learning Program was developed in partnership with National Association for Community College and Entrepreneurship and Arizona State University, and is expected to impact 2,400 young men across 29 HBCUs (Historically Black Colleges and Universities), HSIs (Hispanic Serving Institutions), and community colleges.

For more information about the Tuskegee University Verizon Innovative Learning Program please contact program staff at tvil2018@gmail.com or visit us at www.tuskegee.edu/VILProgram.
