

Geospatial Education and Training (GET)

Tuskegee University

Application Form

The two day GET workshop, which is funded by Tuskegee University Cooperative Extension and organized by Tuskegee University's Geospatial and Climate Change Center, will provide geospatial training to teachers from local minority high schools and community colleges. Participating teachers will benefit from the increased knowledge of Remote Sensing and Geographic Information Systems, and how they apply to most fields. The workshop will help them (1) introduce Geospatial sciences to students and (2) facilitate the integration of Geospatial Sciences into STEM curricula.

The training will be first delivered as face-to-face instruction at Tuskegee University during the two-day meeting, and then through online delivery system as a follow-up to help the teachers keep up with software updates and new technologies. The training will have two key components: Introduction to Remote Sensing to be delivered by Dr. Joseph E Quansah and Introduction to Geographic Information Systems to be delivered by Dr. Souleymane Fall. Honorarium will be paid, as well as certificates of participation given to all participants. We hope you will seize this wonderful opportunity to learn more about geospatial sciences and help mentor and educate the youth to be well prepared for the disciplines of tomorrow.

GET will be held at Tuskegee University on June 24- 27, 2024.

To apply, complete and submit the application form, together with a letter from your principal indicating you teach there.

Since the program fills quickly, application materials should be sent as soon as possible. We will begin making decisions early in the spring and will continue until all open spots are filled. **Application deadline is May 1, 2023.**

Honorarium, housing (if necessary), snacks will be provided for all participating teachers for the two day workshop.

Please email your application. If you need additional information contact us at:
