FUTURE INNOVATORS
INTERNERSHIP PROGRAM

WHAT IS FUTURE INNOVATORS

An program that provides some of America's brightest engineers, from historically under-represented communities, the opportunity to work on cutting-edge projects and programs that directly support the U.S. Army Aviation & Missile Center (AvMC) and the Department of Defense. While working alongside engineers at the National Institute for Aviation Research (NIAR), Spirit Aerosystems and Textron Aviation, students will gain insight into the advanced materials testing & design and development of the military aviation and missile assets. Students will also receive mentoring from leadership at AvMC while exploring engineering careers within the Department of Defense.

REQUIREMENTS

GPA: 3.0 or higher
Preferred Majors: Aerospace, Mechanical, Materials, and Electrical Engineering
Location: Wichita, KS
(Risk of June & Housing Provided)
Rising Junior & Senior Classification preferred

Open to US Citizens only
