

TUSKEGEE UNIVERSITY
College of Engineering
Department of Chemical Engineering
Fall 2023

Course: CENG 0310, Heat Transfer
Lecture Hours: M/W/F 11:00 AM – 12:00 PM
Instructor: Iman Hassani, PhD
Email: ihassani@tuskegee.edu
Office: Luther H. Foster Hall Room 522A
Phone: 334-727-8845
Office Hours: M/W/F 8:00 AM – 9:00 AM and 10:00 AM – 11:00 AM;
T/Th 9:30 AM – 11:00 AM; others by appointment
Credit Hours: 3.00
Prerequisites: CENG 0220
Textbook: Yunus Cengel, Afshin Ghajar, Heat and Mass Transfer: Fundamentals and Applications, 6th Edition, McGraw Hill
Dress Code: Business Casual

General Policies:

- Attendance is important for the successful completion of this course. Students are expected to attend all scheduled classes. A student who arrives in class after the beginning of class will be considered absent but may still attend the remainder of the class. The attendance grade will be based on the percentage of classes present (or excused).
- Office hours are at your disposal to discuss missed classes, provided there's a valid excuse. Yet, in cases where a class is missed without a valid excuse, there won't be arrangements for scheduling office hours to cover the missed material.
- Students are not allowed to schedule any meetings, appointments, etc., anytime during class unless inevitable and discussed with the instructor beforehand.
- All assignments are due at the beginning of class on the due date. Due dates may be extended at the professor's discretion.

- **No late homework is accepted. ALL HOMEWORK must be turned in complete in order for the student to be eligible to sit for the final exam.**
- Submitting the bonus homework isn't compulsory, but it's strongly encouraged.
- **No late design project is accepted.**
- A “day” for the purpose of defining early, timely and late assignments is referenced to the beginning of a scheduled class period. Assignments must be submitted in class and given to the instructor.
- You should use Canvas to submit assignments when asked by the instructor. Some assignments may be given through email or Canvas. You will be held entirely responsible for failure to receive and read emails in a timely manner.
- Any assignments or reports which appear to have been copied will result in a grade of zero for all students involved.
- You should show all your work in homework, tests, exams, or quizzes, not just to receive partial credit in cases where your answer is not correct but also to support your answer and receive full credit when correct. Correct answers that are not fully supported by work will generally not receive full credit.
- Cheating will not be tolerated. **Any student caught cheating will get a zero for that exam.**
- A second offense will result in an F for the course.
- Be prepared to answer questions during the lecture and ask questions on the topic that you do not understand. Also, be prepared to work out example/homework problems on the board.
- Students are not allowed to talk with each other during lectures, quizzes, exams, and final exam. If there is an emergency, the students need to go outside of the class to talk for maintaining a better learning environment in the classroom.
- The student is expected to attend regularly all classes in an attire that meets the College's Dress Code Policy of Business Casual. Students who are not attired appropriately will be asked to leave class and may return with appropriate dress. Students may return with the tardy noted; however, students who do not return will receive an absence. The instructor has the right to establish the rules and regulations for the classroom for it to be a conducive place for teaching and learning. The classroom is the place for the beginning of professional training.
- The final exam will be done in the exam white book given by the instructor in pen.
- Cell phones must be turned off and put away during quizzes, exams, and final exam; otherwise, it will be considered a form of cheating. Cell phones cannot be used as a calculator.
- Cell phones must be turned off as soon as students enter the class and remain off during class. The use of Cell phones during class is discouraged at all times as it is distracting to the user, the instructor, and other students. If a cell phone is seen during class, you may be asked to leave, and the class will be counted as an absence.
- All Quizzes/Tests/Final exam will be CLOSED everything (any book, note, homework, cell phone, etc.) except a standard calculator. The instructor may give you all the required information and equations. Note that students need to know the derivation of some required equations.
- Students must use a basic calculator without equation memory. Advanced calculators are not allowed during Quizzes/Tests/Final exam to promote genuine understanding and problem-solving skills.

- You will have 3 tests throughout the semester and ALL test scores will count towards the calculation of your final grade.
 - No bathroom breaks are allowed during exams. Please use the restroom before the exam starts. Exiting during the exam results in the completion of the test.
 - Quizzes will be announced or unannounced and may be given at any time for 5 to 10 minutes. You will not get extra time if you arrive late. Students who miss a quiz without an official excuse will receive a zero for that work.
 - No sharing of any materials (e.g., calculator) during exams.
 - No make-up assignments (tests, quizzes, and design problems) will be given.
- Exceptions:
- University allowed excuses with WRITTEN PROOF.
 - Medical reasons with WRITTEN PROOF.
- In the event of a medical emergency, proof must be provided within 24 hours of the student's return to campus or release from doctor's care.
 - In the event of an excused absence, make-up assignments must be done by the next class meeting following the date of the excused absence (unless scheduled with the instructor). The student is responsible for his/her own missed assignments.
 - A student, who has a medical excuse (i.e., a note from a physician or qualified health care facility) for missing an exam, waives that excuse when he/she shows up at the exam and begins to take the exam. A make-up exam will not be given.
 - It is likely that any makeup work will need to be scheduled during the interim period. Thus, a student with a valid excuse will receive a grade of I in the course until the work is made up. The exception is if the score on the missed work does not impact the final letter grade. In this case, no make-up assignment will be given. Regarding exams, the first excused absence for an exam will result in the substitution of the final exam score for that exam grade. General makeup policies apply for subsequent excused absences from exams.
 - Effective Spring 2012, the tuskegee.edu email system at Tuskegee University is required for all instructional administrators, faculty, staff, and students.
 - Effective Fall 2023, all instructional administrators, faculty, staff, and students are required to use Canvas.
 - Students are expected to write emails using responsible, courteous, and professional language.
 - Academic dishonesty policies outlined in the undergraduate handbook will be strictly enforced.

Grading Criteria:

Category	Percentage (%)
Exams	40
Final Exam	30
Design Projects	10
Homework and Quizzes	10
Attendance	5
In-class participation	5

Final Grading Scale:

Percentage	Letter Grade
90-100	A
80-89	B
70-79	C
60-69	D
0-59	F

Course Content:

Topic	Session(s)
Introduction and basic concepts	3
Heat conduction equation	3
Steady heat conduction	5
Transient heat conduction	2
Numerical methods in heat conduction	5
Fundamentals of convection	2
External forced convection	2
Internal forced convection	2
Natural convection	4
Boiling and condensation	2
Heat exchangers	5
Radiation heat transfer	3
Final review	1
Tests	3

Course Objectives:

Students will

Objective1. Apply heat transfer principles

Objective2. Design heat exchangers and other heat transfer equipment

Objective3. Prepare design reports

Objective4. Apply computer programs for the solution of heat transfer problems

Course-level Student Learning Outcomes:

Outcomes	1	2	3	4	5	6	7
Objective1	X						
Objective2	X						
Objective3	X		X				
Objective4	X						

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
