Tuskegee University is a nationally and internationally recognized, independent, and state-related institution of higher learning that is located in the State of Alabama. The University has distinctive strengths in the sciences, architecture, business, engineering, health, and other professions, all structured on solid foundations in the liberal arts. In addition, the University’s programs focus on nurturing the development of high-order intellectual and moral qualities among students and stress the connection between education and the highly trained leadership, which Americans need in general, especially for the work force of the 21st Century and beyond. The results we seek are students whose technical, scientific, and professional prowess has been not only rigorously honed, but also sensitively oriented in ways that produce public-spirited graduates who are both competent and morally committed to public service with integrity and excellence.
